Fort Lauderdale, FL: March 4th, 2007: RestaurantLights.com, the world's largest online distributor of table top lighting, introduces in time for the Nightclub & Bar Show, the only remote controlled battery powered LED candle, FlickerCell™ REMOTE.

Jay Cullimore, President of Tropical Lights, Inc. believes "The FlickerCell™ REMOTE meets every restaurateur and designer's 'wish list' providing reduced operating cost, labor and breakage, *and* creates stylish ambient lighting for restaurants, convention centers and public areas. In addition the FlickerCell™ series is an "eco green" product, providing an environmentally friendly alternative to traditional liquid fuel cells and wax candles. FlickerCell™ REMOTE also meets all fire code regulations where open flames are prohibited."

MoodLyte™ Technologies, the electronic manufacturing division of Tropical Lights, Inc., has taken FlickerCell™ REMOTE, which incorporates the same technology as the original FlickerCell™, to the next level by adding a remote control function. By using a remote control, restaurants can turn on and off an unlimited number of FlickerCell™ REMOTE Candles, from as far away as 30 feet.

Restaurants also benefit from reduced breakage of holders as a result of less handling; lower labor costs and perhaps most importantly, eliminates the potential danger from real flames left burning after closing!

The FlickerCell™ REMOTE flickers like a real candle and because it is battery operated, and reusable, it costs less to operate (research has proven operating savings of over \$150 per table, per year compared to using liquid fuel cells) and is safer than an open flame. The FlickerCell™ REMOTE can be used indoors and out and will not be affected by air conditioning or wind.

The FlickerCell™ REMOTE is cost effective to maintain as it uses 2 standard AA batteries that operate up to 200 hours. With its patent pending remote control function and shape, FlickerCell™ REMOTE Candles are designed to fit the majority of lamp bases, replacing liquid fuel cells and wax candles. FlickerCell™ REMOTE also incorporates a "Low Battery" indicator to advise when its time to replace the battery.

During the three day show, as the SHOW SPECIAL, the FlickerCell™ REMOTE "Starter Kit" is available, and is comprised of the following: - 12 FlickerCell™ REMOTE Candles, 1 Remote Control, 12 Frosted Glass Holders, and 24 batteries for ONLY \$199.

Come to booth 4513 to pick up your FlickerCell™ and start saving today!

END

NOTE TO EDITOR

Tropical Lights, Inc., headquartered in Fort Lauderdale, Florida, is the parent company of RestaurantLights.com and MoodLyte Technologies. RestaurantLights.com provides worldwide distribution of tabletop and architectural lighting products, making it the complete one-stop shop for commercial lighting for Bars, Restaurants, Hospitality, Nightclubs, Casinos, Cruise Lines, Event Facilities and Theme Parks, gifting and general Retail.

Today, Tropical Lights, Inc., through RestaurantLights.com has become the world's largest on-line tabletop lighting distributor. Tropical Lights, Inc., has four different distribution outlets and brands, namely RestaurantLights.com, eOilCandles.com for the consumer, Tropical Lights™ brand Candle Oils and liquid products and MoodLyte™ Technologies, the electronic lighting manufacturing division.

Tropical Lights, Inc. has a patent pending for: FlickerCell™ and FlickerCell™ Remote. FlickerCell™ is a reusable, battery operated LED candle cell that flickers like a real candle. Its unique patent pending shape fits most lamps and replaces traditional wax candles or liquid fuel cells, safely and more cost effectively.

Tropical Lights, Inc., through its divisions, has a worldwide network of distribution and OEM partners.
